## REMARKS

The figures of births and deaths shown in this statement for week ending the 3rd March, 1956, relate to 156 towns with an estimated population of 19,171 thousands. The total number of towns is 317 and their population is 41,516 thousands. Thus 49% of the total number of towns representing 46% of the total population is covered in this statement. The number of births and deaths recorded in these towns were 11,402 and 4,835 representing birth and death rates of 30.9 and 13.1 per thousand of population respectively.

(a) *States (Part A and C).*—The data here relate to 120 towns with an estimated population of 13,568 thousands. Information about Bihar, Bombay, Delhi, Madhya Pradesh and West Bengal could not be included. The total number of towns is 252 and their population is 33,432 thousands. Thus 48% of the total number of towns representing 41% of the total

population is covered. The number of births and deaths recorded in these towns were 9,041 and 3,942 representing birth rates and death rates of 34.7 and 15.1 per thousand of population respectively. The table at the end gives the position by States.

No town recorded a high death rate of 50 or over per thousand of population.

(b) *States (Part B).*—The data here relate to 36 towns with an estimated population of 5,603 thousands. The total number of towns is 65 and their population is 80,84 thousands. Thus 55% of the total number of towns representing 69% of the total population is covered. The number of births and deaths recorded in these towns were 2,361 and 893 representing birth and death rates of 21.9 and 8.3 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population.

Explanation of symbols used :— B.—Births; B.R.—Birth Rate; C.—Cholera; S.—Smallpox; P.—Plague; F.—Fever; D.D.—Dysentery and Diarrhoea; R.D.—Respiratory Diseases; M.D.—Maternal Deaths; D.R.—Death Rates; I.D.—Infantile Deaths (included in total deaths); ..—Nil Information.

## REMARKS

The figures of births and deaths shown in this statement for week ending the 10th March 1956 relate to 177 towns with an estimated population of 21,484 thousands. The total number of towns is 317 and their population is 41,516 thousands. Thus 56% of the total number of towns representing 52% of the total population is covered in this statement. The number of births and deaths recorded in these towns were 21,484 and 4,718 representing birth and death rates of 27.9 and 11.4 per thousand of population respectively.

(a) States (Part A and C) :—The data here relate to 139 towns with an estimated population of 15,549 thousands. Information about Bombay, Delhi, Madhya Pradesh and West Bengal could not be included. The total number of towns is 252 and their population is 33,432 thousands. Thus 55% of the total number of towns representing 47% of the total population is covered. The number of

births and deaths recorded in these towns were 8,730 and 3,819 representing birth rates and death rates of 29.2 and 12.8 per thousand of population respectively. The table at the end gives the position by States.

No town recorded a high death rate of 50 or over per thousand of population.

(b) States (Part B) :—The data here relate to 38 towns with an estimated population of 5,935 thousands. The total number of towns is 65 and their population is 8,084 thousands. This 58% of the total number of towns representing 73% of the total population is covered. The number of births and deaths recorded in these towns were 2,801 and 898 representing birth and death rates of 24.5 and 7.8 per thousand of population respectively. No town recorded a high death rate of 50 or over per thousand of population.
